SUMMARY

Driven and adaptable Computer Science undergraduate at SRM University AP, focusing on Artificial Intelligence, Machine Learning, and Full-Stack/MERN Development. Skilled in C, C++, Python, Java, and Web Development, with strong analytical and problem-solving abilities. Hands-on experience building projects such as an Autism Prediction System and multiple web applications. Passionate about applying technical expertise to real-world challenges, exploring entrepreneurial opportunities, and contributing to innovative, impactful technology projects.

WORK EXPERIENCE

Campus Research Intern, SRM University

May 2025 - July

- Developed a machine learning framework to predict Autism Spectrum Disorder (ASD) in adults using the UCI dataset. Conducted data preprocessing, exploratory data analysis, and trained multiple models to identify key predictive features. Additionally, created a user-friendly web application with Flask to demonstrate practical deployment, enabling accessible autism screening for users.

PROJECTS

Online Auction System

Built a system that enables users to register, bid, and manage items in a simulated auction environment. Designed modules for user authentication, bidding flow, winner declaration, and transaction records. Implemented full-stack development with real-time updates using WebSockets to ensure smooth functionality and fairness in the auction process.

Movie Seat Reservation System

Designed and developed a web-based movie seat reservation system that allows users to select and book seats in real-time. Ensured a user-friendly experience with dynamic seat selection and integrated payment functionality.

Snake Game

Developed a classic Snake Game using C++ to apply data structures and algorithms concepts. Implemented logic for snake movement, food generation, collision detection, and dynamic score tracking. Focused on optimizing gameplay using arrays and linked list concepts for smooth execution in a console-based environment.

EDUCATION

2023 - 2027	Bachelor of Technology in Computer Science at SRM University	(8.85)
2021 - 2023	Class 12th at Graviity IIT and NEET Education Institution	(95%)
2021	ICSE Class 10th at Vikasa Vidhya Vanam	(80%)

CERTIFICATIONS

Finlatics Machine Learning Program Certification

2025

- Gained proficiency in Machine Learning with Python, successfully implementing machine learning algorithms, data pre-processing, and both supervised and unsupervised techniques to drive data-driven solutions. Worked on hands-on projects focused on navigating complex datasets, extracting meaningful insights, and transforming business goals into actionable machine learning outcomes.

SKILLS

Technical Stack	C, C++, Python, Java, CSS, HTML, Javascript, React.js, Node.js
Databases	MySQL, MongoDB
Microsoft Office	Microsoft Excel, Power BI, Microsoft Word and Microsoft PowerPoint
Business and Communication	Marketing Minor (Digital Marketing, Human centered design and development, Social-media marketing)
Other Skills	Problem-Solving, Logical Thinking and Film Making

EXTRACURRICULAR & INTERESTS

Cinemates Club (2023 – Present)	Active member with experience in organizing major college events such as CineVie and FilmGala. Contributed to event planning, coordination, and execution, fostering creative engagement in film and media.
Sports Enthusiast	Passionate about playing a variety of sports including basketball, cricket, and table tennis. Actively engages in team-based and individual games, promoting fitness, teamwork, and competitive spirit.
